

# Source-Nexus Basic 1.1 Manual Installation Instructions

Source-Nexus Basic 1.1 is only directly compatible with macOS 10.6 - 10.12. For compatibility with newer versions of macOS, a manual install can be done which involves running the Source-Nexus Audio Driver Installer and then manually moving the Source-Nexus Basic plugin files to the correct directories.

## Source-Nexus Audio Driver Installation

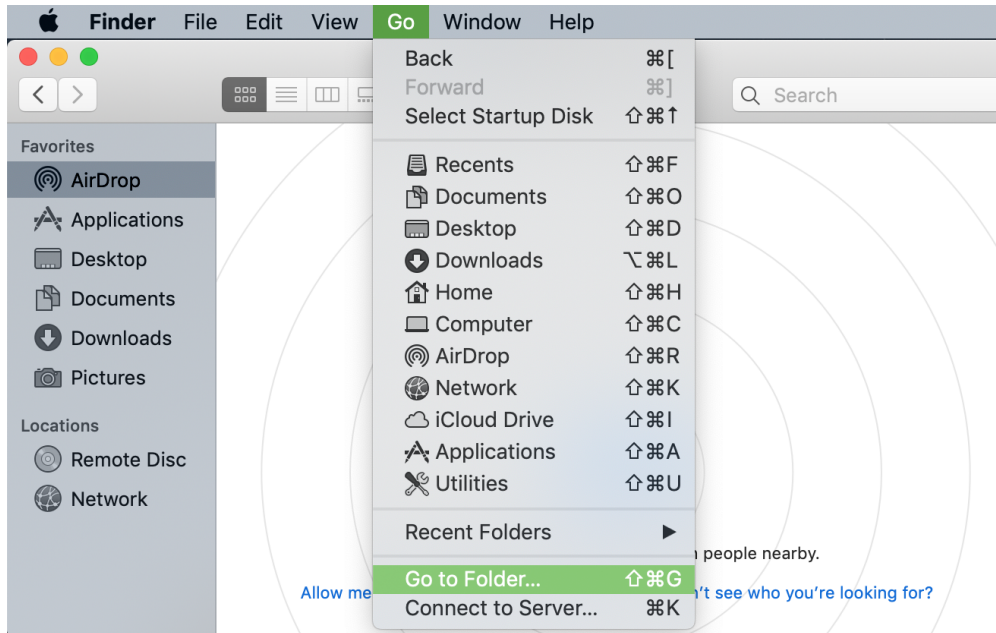

1. [Download the Source-Nexus Basic 1.1](#) manual installation package and unzip.
2. Open the *Source-Nexus Audio Driver Installer* .dmg file, and double click *Source-Nexus Audio Driver.pkg* to install.

The various plugin files are located in the *Source-Nexus Basic 1.1 Plugins* folder, see the following instructions to manually install the plugin.

# AAX Plugin Installation (Pro Tools)

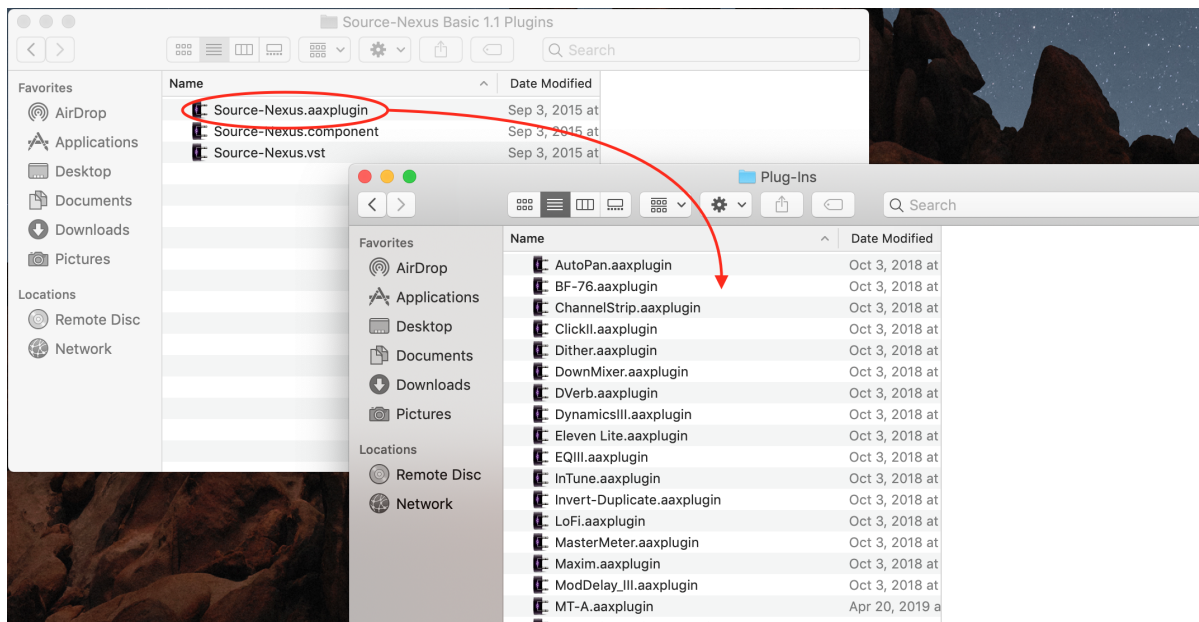

1. Open *Finder*, go to *Go* in the menu bar, and select *Go To Folder...*

2. Enter the following folder path and select *Go*.

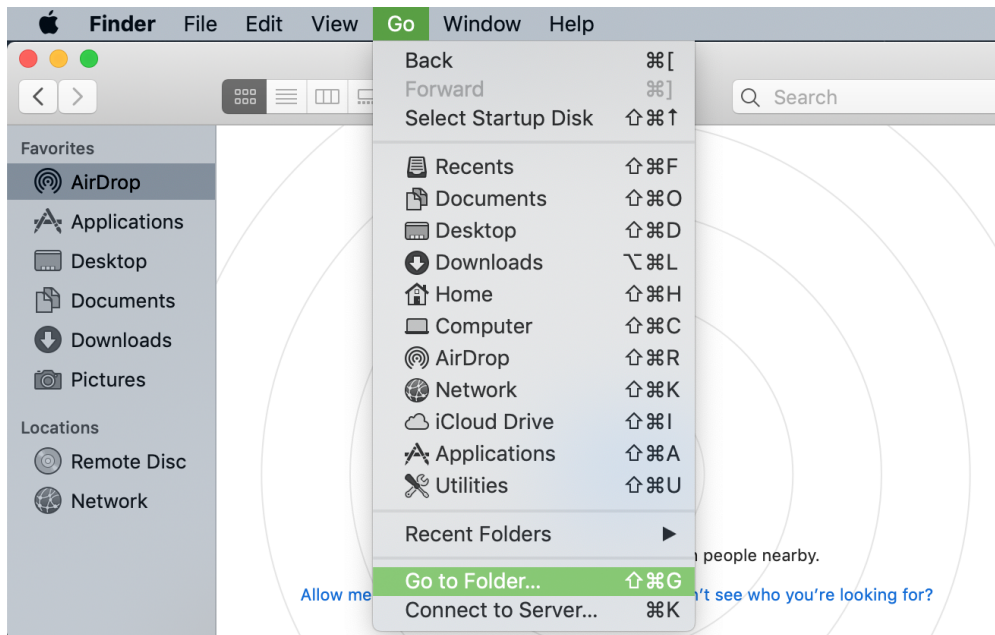

`/Library/Application Support/Avid/Audio/Plug-Ins`

3. Move the *Source-Nexus.aaxplugin* file to the above directory.

# AU Plugin Installation (Logic Pro, Garageband, etc.)

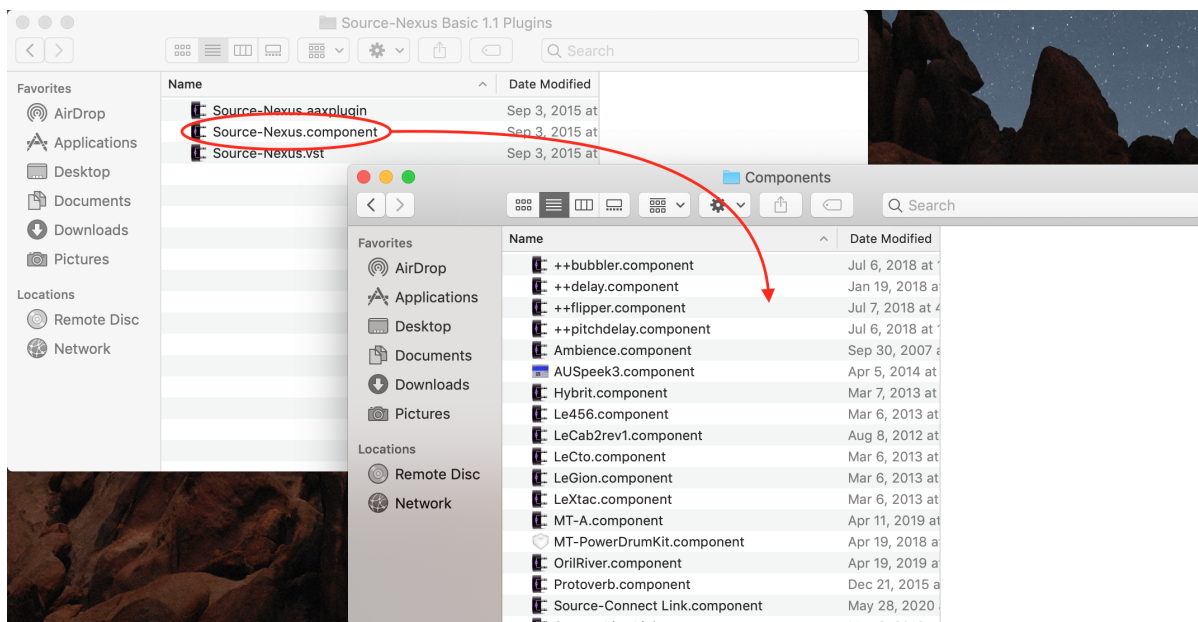

1. Open *Finder*, go to *Go* in the menu bar, and select *Go To Folder...*

2. Enter the following folder path and select *Go*.

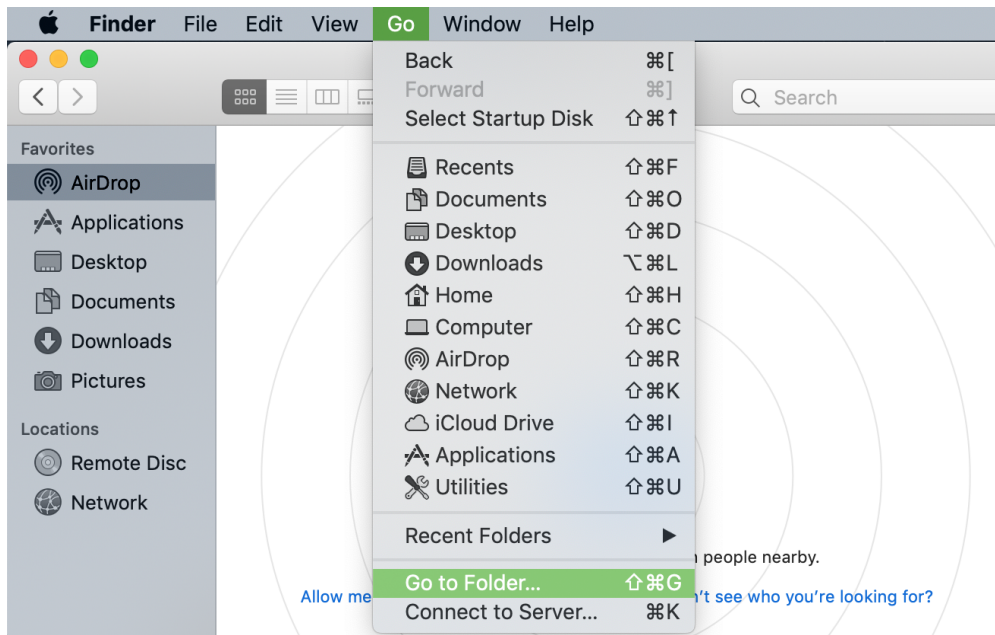

`/Library/Audio/Plug-Ins/Components`

3. Move the *Source-Nexus.component* file to the above directory.

# VST Plugin Installation (Cubase, Nuendo, etc.)

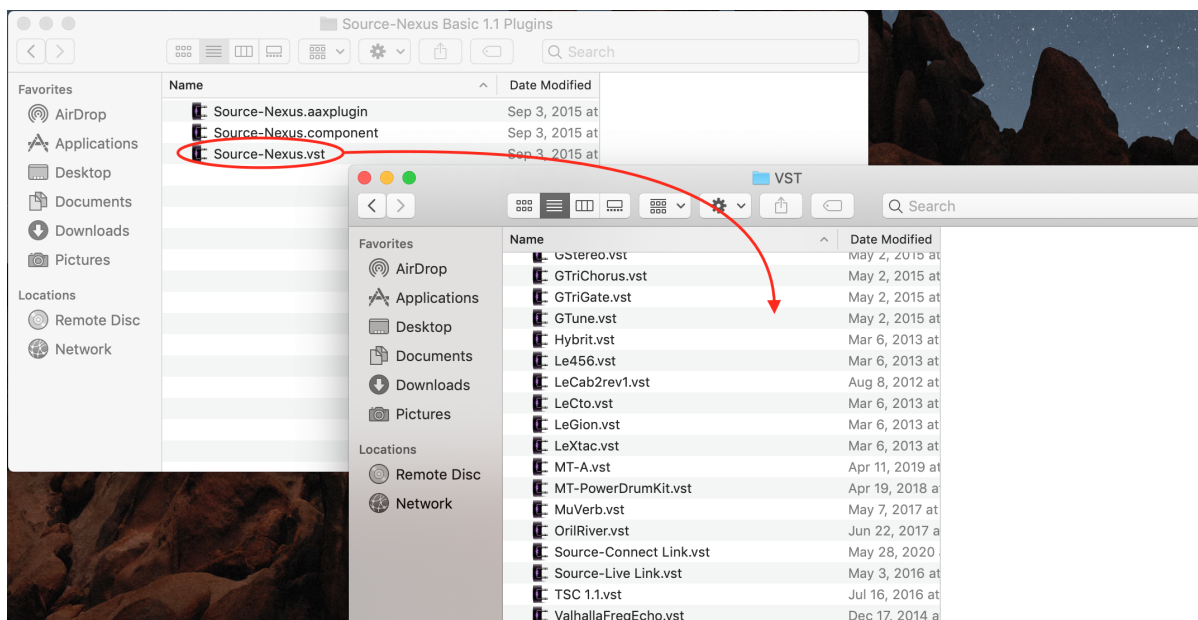

1. Open *Finder*, go to *Go* in the menu bar, and select *Go To Folder...*

2. Enter the following folder path and select *Go*.

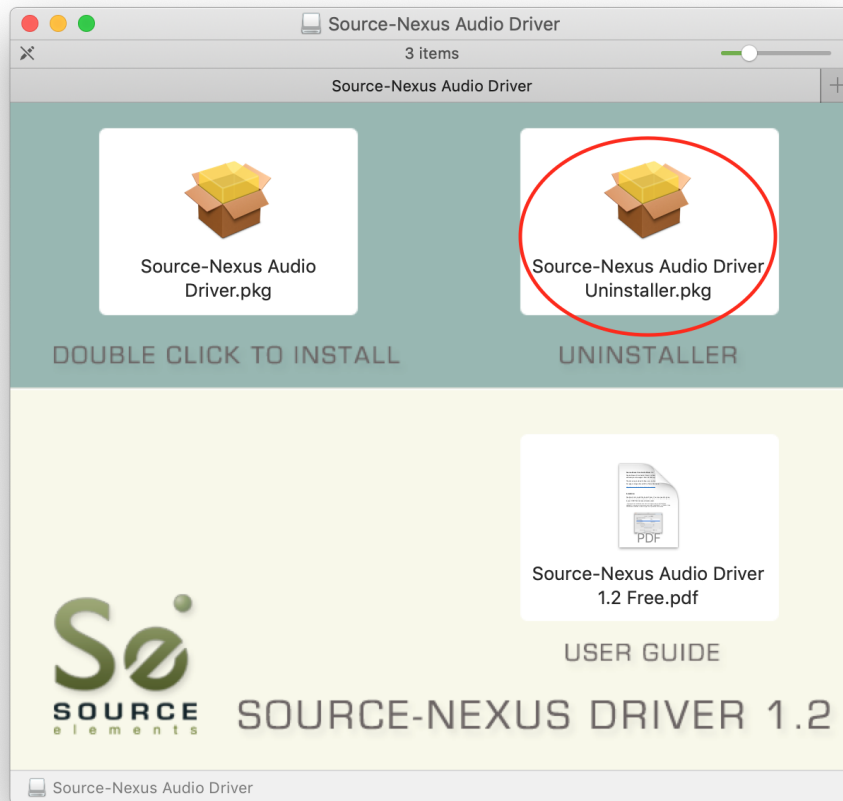

`/Library/Audio/Plug-Ins/VST`

3. Move the *Source-Nexus.vst* file to the above directory.

# Uninstalling

1. Open the *Source-Nexus Audio Driver Installer* dmg file, and double click *Source-Nexus Audio Driver Uninstaller.pkg* to uninstall.

2. Delete the Source-Nexus plugin files from the above directories.
